

OXYL-PRO

Hard Surface Disinfectant

AREA OF USE

- Non porous hard surface disinfection

Oxyl-Pro Hard Surface Disinfectant is a multi-purpose product with a unique environmental profile. It is based on hydrogen peroxide and provides protection against harmful bacteria and viruses. Supplied as a ready to use formulation for spraying onto non-porous hard surfaces. The product has efficacy against viruses in 120 seconds at the dilution supplied.

There are no chemical hazard classes associated with the product.

METHOD OF USE

Hard surface disinfection: Spray directly onto clean surfaces and leave to dry. There is no need to rinse. Surfaces that are soiled or dirty should be first cleaned with a proprietary cleaner.
