

# OXYL-PRO

## Hand and Surface Disinfectant

### AREA OF USE

- Hand disinfection
- Surface disinfection

Oxyl-Pro Hand and Surface Disinfectant is a multi-purpose product with a unique environmental profile. Based on hydrogen peroxide it provides protection against harmful bacteria and viruses. Supplied as a ready to use formulation for spraying onto hands and non-porous hard surfaces.

### METHOD OF USE

**Hand Disinfection:** Spray enough solution onto hands to cover all areas up to the wrist. Rub until dry. Do not use on visibly dirty or greasy hands – wash before applying.

**Hard surface disinfection:** Spray directly onto clean surfaces and leave to dry. There is no need to rinse. Surfaces that are soiled or dirty should be first cleaned with a proprietary cleaner.
